

Fachpublikationen des PIK zur Simulation von Eiszeiten

(Publikationsdatum bis einschl. 2012)

2012

- [53] Brovkin, V, Ganopolski, A, Archer, D, and Münhoven G (2012) Glacial CO₂ cycle as a succession of key physical and biogeochemical processes. *Clim. Past*, 8, 251–264.
- [52] Ganopolski A, and Calov, R. (2012) Simulation of glacial cycles with an Earth system model. In *Climate Change*, A Berger et al. (eds.), part 2, 49-55, doi: 10.1007/978-3-7091-0973-1_3, Springer-Verlag, Vienna

2011

- [51] Álvarez-Solas, J., Montoya, M., Ritz, C., Ramstein, G., Charbit, S., Dumas, C., Nisancioğlu, K., Dokken, T. and A. Ganopolski (2011) Heinrich event 1: an example of dynamical ice-sheet reaction to oceanic changes. *Clim. Past*, 7, 1297–1306.
- [50] Andreev, A.A., Schirrmeister L., Tarasov, P. E., Ganopolski, A., Brovkin V., Siegert C., Wetterich, S., Hubberten H.-W. (2011) Vegetation and climate history in the Laptev Sea region (Arctic Siberia) during Late Quaternary inferred from pollen records, *Quaternary Science Reviews*, 30, 2182-2199, doi:10.1016/j.quascirev.2010.12.026
- [49] Ganopolski, A, Calov R. (2011) The role of orbital forcing, carbon dioxide and regolith in 100 kyr cycles. *Clim. Past*, 7, 1415–1425
- [48] Montoya, M., A. Born, A. Levermann (2011) Reversed North Atlantic gyre dynamics in present and glacial climates. *Climate Dynamics*, 36, 1107-1118.
- [47] Robinson, A., Calov, R., and Ganopolski, A. (2011) Greenland ice sheet model parameters constrained using simulations of the Eemian Interglacial, *Clim. Past*, 7, 381–396, doi:10.5194/cp-7-381-2011

2010

- [46] Bauer, E., and Ganopolski, A. (2010) Aeolian dust modeling over the past four glacial cycles with CLIMBER-2, *Global and Planetary Change*, 74, 49-60, doi:10.1016/j.gloplacha.2010.07.009
- [45] Calov R, Greve R, Abe-Ouchi A, Bueler E, Huybrechts P, Johnson JV, Pattyn F, Pollard D, Ritz C, Saito F, and Tarasov L (2010) Results from the ice sheet model intercomparison project - Heinrich event intercomparison (ISMIP HEINO). *J Glaciol* 56 (197): 371-383
- [44] Ganopolski, A., R. Calov, and M. Claussen (2010) Simulation of the last glacial cycle with a coupled climate ice-sheet model of intermediate complexity. *Clim. Past*, 6, 229-244.
- [43] Margari V., Skinner L. C., Tzedakis P. C., A. Ganopolski , M. Vautravers and N. J. Shackleton (2010) The nature of millennial-scale climate variability during

the past two glacial periods, *Nature Geoscience*, 3, 127-131, doi:10.1038/ngeo740

2009

- [42] Ganopolski, A. and Roche, D. (2009) On the nature of lead-lag relationships during glacial-interglacial climate transitions, *Quat. Sci. Rev.*, 37/38, 3361-3378, doi:10.1016/j.quascirev.2009.09.019
- [41] Jin L., Peng, Y., Chen, F., and Ganopolski, A. (2009) Modeling sensitivity study of the possible impact of snow and glaciers developing over Tibetan Plateau on Holocene African-Asian summer monsoon climate. *Clim. Past*, 5, 457–469.
- [40] Calov R, Ganopolski A, Kubatzki C & Claussen M (2009) Mechanisms and time scales of glacial inception simulated with an Earth system model of intermediate complexity. *Clim Past*, 5, 245-258

2008

- [39] Montoya M. and A. Levermann (2008) Surface wind stress threshold for glacial Atlantic overturning, *Geophysical Research Letters*, 35, L03608

2007

- [38] Arz H. W., F. Lamy, A. Ganopolski, N. Nowaczyk, and J. Pätzold (2007) Dominant Northern Hemisphere climate control over millennial-scale glacial sea-level variability, *Quat. Sci. Rev.*, 26, 312-321.
- [37] Brovkin, V., A. Ganopolski, D. Archer, and S. Rahmstorf (2007), Lowering of glacial atmospheric CO₂ in response to changes in oceanic circulation and marine biogeochemistry, *Paleoceanography*, 22, PA4202, doi:10.1029/2006PA001380.
- [36] Jin, L., F. Chen, A. Ganopolski, M. Claussen (2007) Response of East Asian climate to Dansgaard/Oeschger and Heinrich events in a coupled model of intermediate complexity, *J. Geophys. Res.*, 112, D06117, doi:10.1029/2006JD007316.
- [35] Mignot, J., A. Ganopolski, and A. Levermann (2007) Atlantic subsurface temperatures: response to a shut-down of the overturning circulation and consequences for its recovery. *J. Climate*, 20, 4884-4898.
- [34] Weber, S.L., S. S. Drijfhout, A. Abe-Ouchi, M. Crucifix, M. Eby, A. Ganopolski, M. Murakami, B. Otto-Bliesner, and W. R. Peltier (2007) The modern and glacial overturning circulation in the Atlantic ocean in PMIP coupled model simulations. *Climate of the Past*, 3, 51–64.

2006

- [33] Greve R, Takahama R, and Calov R (2006) Simulation of large-scale ice-sheet surges: the ISMIP HEINO experiments. *Polar Meteorology and Glaciology* 20: 1-15

- [32] Claussen, M., J. Fohlmeister, A. Ganopolski, and V. Brovkin (2006) Vegetation dynamics amplifies precessional forcing, *Geophys. Res. Lett.*, 33, L09709, doi:10.1029/2006GL026111.
- [31] Kubatzki, C., M. Claussen, R. Calov, and A. Ganopolski (2006) Sensitivity of the last glacial inception to initial and surface conditions, *Clim Dyn*, DOI 10.1007/s00382-006-0136-6.
- [30] Kubatzki, C., M. Claussen, R. Calov, and A. Ganopolski (2007) Modelling the end of an interglacial (MIS 1, 5, 7, 9, 11) in *The climate of past interglacials*, ed. F. Sirocko, pp. 583-593, Elsevier, Amsterdam
- [29] Schneider von Deimling, T., A. Ganopolski, H. Held, and S. Rahmstorf (2006), How cold was the Last Glacial Maximum?, *Geophys. Res. Lett.*, 33, L14709, doi:10.1029/2006GL026484.
- [28] Schneider von Deimling, T., H. Held, Ganopolski, and S. Rahmstorf (2006) Climate sensitivity estimated from ensemble simulations of glacial climate. *Clim Dyn* 27: 149–163, DOI 10.1007/s00382-006-0126-8.

2005

- [27] Archer, D., and A. Ganopolski (2005) A movable trigger: Fossil fuel CO₂ and the onset of the next glaciation, *Geochem. Geophys. Geosyst.*, 6, Q05003, doi:10.1029/2004GC000891.
- [26] Braun, H., M. Christl, S. Rahmstorf, A. Ganopolski, A. Mangini, C. Kubatzki, K. Roth, and B. Kromer, (2005) Possible solar origin of the glacial 1,470-year climate cycle demonstrated in a coupled model, *Nature*, 438, 208-211, doi:10.1038.
- [25] Calov, R., and A. Ganopolski (2005) Multistability and hysteresis in the climate-cryosphere system under orbital forcing, *Geophys. Res. Lett.*, 32, L21717, doi:10.1029/2005GL024518.
- [24] Calov, R., A. Ganopolski, M. Claussen, V. Petoukhov, and R. Greve (2005) Transient simulation of the last glacial inception with an atmosphere-ocean-vegetation-ice sheet. Part I: Glacial inception as a bifurcation of the climate system. *Clim Dyn* 24 (6): 545-561.
- [23] Calov, R., A. Ganopolski, V. Petoukhov, M. Claussen, V. Brovkin, and C. Kubatzki (2005) Transient simulation of the last glacial inception with an atmosphere-ocean-vegetation-ice sheet model: Part II: Sensitivity and feedback analysis. *Clim Dyn* 24 (6): 563-576.
- [22] Claussen, M., V. Brovkin, R. Calov, A. Ganopolski, and C. Kubatzki (2005) Did humankind prevent a holocene glaciation. *Climatic Change*, 69: 409–417.
- [21] Jahn, A., M. Claussen, A. Ganopolski, and V. Brovkin (2005) Quantifying the effect of vegetation dynamics on the climate of the Last Glacial Maximum, *Climate of the Past*, 1, 1-7.
- [20] Jin, L., A. Ganopolski, F. Chen, M. Claussen, and H. Wang (2005) Impacts of snow and glaciers over Tibetan Plateau on Holocene climate change: Sensitivity experiments with a coupled model of intermediate complexity, *Geophys. Res. Lett.*, 32, L17709, doi:10.1029/2005GL023202.

- [19] Haug G.H., A. Ganopolski, D.M. Sigman, A. Rosell-Mele, G.E.A. Swann, R. Tiedemann, S.L. Jaccard, J. Bollmann, M.A. Maslin, M.J. Leng, and G. Eglinton (2005) North Pacific seasonality and the glaciation of North America 2.7 million years ago. *Nature*, 433: 821-825.

2004

- [18] Archer, D., P. Martin, B. Buffett, V. Brovkin, S. Rahmstorf, and A. Ganopolski (2004) The importance of ocean temperature to global biogeochemistry. *Earth and Planetary Science Letters*, 222: 333-348.
- [17] Bauer, E., A. Ganopolski, and M. Montoya (2004) Simulation of the cold climate event 8200 years ago by meltwater outburst from Lake Agassiz. *Paleoceanography*. 19 (3): 3014-3027.
- [16] Roche, D., D. Paillard, A. Ganopolski, and G. Hoffmann (2004) Oceanic oxygen-18 at the present day and LGM: equilibrium simulations with a coupled climate model of intermediate complexity. *Earth and Planetary Science Letters*, 218: 317-330.

2003

- [15] Claussen, M., A. Ganopolski, V. Brovkin, F.-W. Gerstengarbe, and P. Werner (2003) Simulated Global-Scale Response of the Climate System to Dansgaard-Oeschger and Heinrich events. *Clim Dynam.*, 21: 361-370.
- [14] Ganopolski, A. (2003) Glacial Integrative modelling. *Philos T Roy Soc A*, 361: 1871-1884.
- [13] Khodri, M., G. Ramstein, D. Paillard, J.-C. Duplessy, M. Kageyama, and A. Ganopolski (2003) Modelling the climate evolution from the last interglacial to the start of the last glaciation: the role of Arctic Ocean freshwater budget. *Geophys. Rev. Lett.*, 30, doi : 10.1029/2003GL017108.
- [12] Rahmstorf, S., Timing of abrupt climate change: A precise clock (2003) *Geophys. Res. Lett.*, 30(10), 1510, doi:10.1029/ 2003GL017115.

2002

- [11] Brovkin, V., M. Hofmann, J. Bendtsen, and A. Ganopolski, A. (2002) Ocean biology could control atmospheric $d^{13}C$ during glacial-interglacial cycle. *G³ (Geochemistry, Geophysics, Geosystems)*, 3, doi: 10.1029/2001GC00270
- [10] Brovkin, V., J. Bendtsen, M. Claussen, A. Ganopolski, C. Kubatzki, V. Petoukhov, and A. Andreev (2002) Carbon cycle, vegetation and climate dynamics in the Holocene: Experiments with the CLIMBER-2 model. *Global Biogeochemical Cycles*, 16. doi:10.1029/2001GB001662.
- [9] Calov, R., A. Ganopolski, V. Petoukhov, M. Claussen, and R. Greve (2002) Large-scale instabilities of the Laurentide ice sheet simulated in a fully coupled climate-system model. *Geophys. Rev. Lett.*, 29 (24), 2216, doi:10.1029/2002GL016078.
- [8] Ganopolski A., and S. Rahmstorf S (2002) Abrupt glacial climate changes due to stochastic resonance, *Phys Rev Lett*, 88 (3): art. no. 038501.

- [7] Mogensen I.A., S.J. Johnsen, A. Ganopolski, and S. Rahmstorf (2002) An investigation of rapid warm transitions during MIS2 and MIS3 using Greenland ice-core data and the CLIMBER-2 model. *Annals of Glaciology* 35: 398-402.

2001

- [6] Ganopolski, A., and S. Rahmstorf (2001) Stability and variability of the thermohaline circulation in the past and future: a study with a coupled model of intermediate complexity, in *The ocean and rapid climate change: Past, Present, and Future*, eds. D. Seidov, M. Maslin and B. J. Haupt, pp. 261-275. American Geophysical Union, Washington, D.C.
- [5] Ganopolski, A., and S. Rahmstorf (2001) Rapid changes of glacial climate simulated in a coupled climate model. *Nature*, 409 : 153-158.

2000

- [4] Kubatzki C., M. Montoya, S. Rahmstorf, A. Ganopolski, and M. Claussen (2000) Comparison of a coupled global model of intermediate complexity and an AOGCM for the last interglacial. *Climate Dyn*, 16: 799-814.

1999

- [3] Claussen M., C. Kubatzki, V. Brovkin, A. Ganopolski, P. Hoelzmann, and H.J. Pachur (1999) Simulation of an abrupt change in Saharan vegetation in the mid-Holocene. *Geophys Res Lett*, 26: (14) 2037-2040.

1998

- [2] Ganopolski, A., C. Kubatzki, M. Claussen, V. Brovkin, and V. Petoukhov (1998) The influence of vegetation-atmosphere-ocean interaction on climate during the mid-Holocene, *Science*, 280: (5371) 1916-1919.
- [1] Ganopolski, A., S. Rahmstorf, V. Petoukhov, and M. Claussen (1998) Simulation of modern and glacial climates with a coupled global model of intermediate complexity, *Nature*, 391: (6665) 351-356.
