

QUIZ CONSUMPTION AND SUSTAINABILITY

The quiz is based on the materials of **consumption and sustainability**. The quiz is available as a **PDF presentation** and as a **quiz app called Kahoot!**

The quiz contains questions and answers on aspects of consumption and sustainability. Five questions are available on each of the eight topics: **consumer behaviour, food, nutrition, meat consumption, food waste, energy consumption, water and transport**.

The quiz can also be played in the “asked – hunted style” (Gefragt – Gejagt). In eight teams, the students deal with the materials on consumption and sustainability and thus become experts in their field. Each team must prove its special or general knowledge. In this way, points are collected for the right answers.

Playing the quiz via the PDF format, a timer (e.g. mobile phone) is needed to accurately determine the remaining installment time. When playing with Kahoot! the time is already set (60 sec. for each question).

Consumption and Sustainability Quiz as PDF

This presentation includes the quiz on "Consumption and Sustainability", which is based on the background materials on consumer behaviour.

Consumption and Sustainability Quiz App Kahoot!

The quiz can be played as a team or with individual players. All you need is the Kahoot app. The address is:
